INSURANCE **SOLUTION**

ENSURING INFORMED DECISIONS

INTERNATIONAL

As a leader in software solutions we at MAPO have made an incredible impact on how Original Equipment Manufacturers conduct market research on their vehicles and equipment. The vast amount of parts data we have in MAPO has caught the attention of the Insurance Industry.

Processing claims has a huge cost factor in manpower and the time it takes to analyses the claim. Researching the correct parts and pricing takes many hours/days and still causes incorrect results. MAPO developed a solution that accurately identifying a model, then monitor the part numbers and pricing of the parts claimed to see if it does fit the model with the VIN on the claim. Several other checks are also done that will ensure the correct decisions is made in repairing the vehicle. A complete claim analysis in seconds.

MAPO offers fast and accurate collision parts information from planning stage to the actual monitoring and claims processing stage. Vice versa, channeling claims information to the OEM opens doors in negotiations of fitting more genuine parts and saving a car.

A system developed and designed specifically targeted at Insurance and OEM's requirements, but beneficial to Insurance, OEM and most important the Consumer.

Reduce claims processing cost Monitor correct part numbers OEM approved ABR listings Model warranty status Monitor correct pricing Save a Car initiative Identify the model

INSURANCE SOLUTION

ENSURING INFORMED DECISIONS

As a leader in software solutions we at MAPO have made an incredible impact on how Original Equipment Manufacturers conduct market research on their vehicles and equipment. The vast amount of parts data we have in MAPO has caught the attention of the Insurance Industry.

Processing claims has a huge cost factor in manpower and the time it takes to analyse the claim. Researching the correct parts and pricing takes many hours/days and still causes incorrect results. MAPO developed a solution that accurately identifies a model, then compares the part numbers and pricing of the parts claimed to see if it does fit the model with the VIN on the claim. Several other checks are also done that will ensure the correct decisions is made in repairing the vehicle. A complete claim analysis in seconds.

MAPO offers fast and accurate collision parts information from pre-claim stage at registration to the actual monitoring and claims processing post claim stage when claims are settled. In retrospect, the channeling claims information to the OEM opens doors in negotiations for fitment of more genuine parts and saving a car. Our focus point:

	Inaccurate identification of the vehicle	Identification using the VIN number.	
	Insurers do not know which parts fit specific vehicles	Parts are sort into baskets by Model/variant.	
OEM ISSUES	Insurers do not have accurate parts pricing information	One system offers 24/7 up-to-date data.	NS
& OEM	Insurers may not have the information about who the approved repairer is	List of OEM approved ABR and Dealers.	οΓητιο
NSURANCE 8	OEMs lose business to the aftermarket as a result of not being able to negotiate	Direct communication OEM & Insurance.	1APO S
INSUR	High cost and inefficient processing of claims	MAPO processes a claim in milliseconds.	2
	OEMs & insurers are unable to identify trends from sales in insurance claims	Full reporting to both OEM and Insurance.	
	Write off cars due to excessive damage estimates	Effortlessly manage "Save a Car" initiative.	

A system developed and designed specifically focusing on Insurance and OEM requirements, but also beneficial to the Consumer.

Do you offer a proof of concept trail?

Yes, MAPO offers 1,000 (one thousand) claims of your selection to be processed at NO CHARGE.

How does the transfer of data/claim work?

The data/claim is sent to MAPO via a API query is a standard format, we process the request and sent the answer back via an API query in a standard format.

In what format should the data be?

Please request a sample to the required format of the data. You can phone our office (012) 997-1318 and speak to Craig Patrick (Senior Sales Executive) and specialist in MAPO Insurance and Fleet software sales.

How long does it take to process the claim?

The answer to the API query is done in milliseconds. MAPO estimate 500,000 claims to be processed per year. If we should receive all these claims at once, it will take approx. 30min to process.

Does MAPO offer a reporting system on processed claims?

Yes, this feature in included in the license fee. The software is Internet based and accessed using a username and password.

The software offers the following:

- Individual claim view.
- Full analytics by claim number.
- Full analytics by VIN number.
- Overview on all claims.
- Overview by OEM.
- Overview by model/variant.
- Overview by model class.
- Overview by Auto Body Repairer.
- Overview by parts basket.
- Overview on parts price fluctuation.
- Direct communication to OEM.
- Full management of Save a Car project.
- And more.....

How do we subscribe to this MAPO feature?

This is a standard registration process to receive a ID KEY. <u>OEMs must approve all registrations to allow</u> the transfer of data to the 3rd party. The ID KEY will be used to identify the user, there is then a whole range of data queries that can be requested. Please see API DATA for more information.

How do we register for a ID KEY?

Go to <u>https://api.mapo-int.com</u> and click on the **Register For API Key** button and follow the easy steps to receive your ID KEY. The registration process takes just a few minutes, but be sure to have all your company details available. Once we've received your registration, one of our Account Mangers will contact you.

Hope this is helpful, for more information please feel free to contact our office (012) 997-1318 and speak to Craig Patrick (Senior Sales Executive) and specialist in MAPO Insurance and Fleet software sales.

Kind Regards

UAN
